LinkedIn Profile

Personal Profile

A Cybersecurity Engineer with over 7 years of hands-on experience designing, assessing, and improving security controls across enterprise and corporate environments. I possess a strong technical foundation in network security, red teaming, penetration testing, API security, DevSecOps, cloud security, mobile security, IT Audits, Linux administration, and Cyber security governance. I have successfully conducted 200+ Cyber security projects, including vulnerability assessments, penetration tests, configuration reviews, risk audits across on-premises, cloud, and hybrid infrastructures.

I am highly capable of performing complex technical assessments while maintaining a business focus and meeting client requirements. Throughout my career, I have led security projects for high-end profile enterprise clients, translating advanced technical findings into clear, actionable, and executive-level risk insights. Driven by continuous learning and actively staying current with emerging trends, red team tradecraft, AI risks, cloud security risks, and evolving cybersecurity best practices to ensure systems remain secure against modern threat landscapes.

Work Experience

Company: Silensec Africa **Role:** Senior Security Engineer
Period: Dec 2024 up to Date

Responsibilities

- Conduct regular security assessments, code reviews, and penetration testing to identify vulnerabilities in applications and software.
- Mentor other cyber securing engineers and contribute to internal training, tool development, and process improvement.
- Analyse industry trends and standards regarding tooling and techniques and incorporate that as quality improvement.
- Research and develop new attack techniques and tooling that can be used to streamline security assessment process and results.
- Automate security testing and vulnerability management processes where appropriate.
- Collaborate with clients to understand their security objectives and tailor engagement strategies accordingly.
- Work closely with Silensec customers to ensure security best practices are integrated throughout the software development lifecycle (SDLC), including secure coding guidelines.
- Continuously analyzing emerging vulnerabilities, adversarial TTPs, and offensive techniques, and integrating findings into training content to ensure alignment with the most current and relevant threat landscape.

Projects

- MITRE Attack Explorer
- Attack Surface Management platform
- Autonomous AI Pentesting Tool

Soft Skills

- ✓ Presentation skills
- ✓ Team leadership
- ✓ Mentoring
- ✓ Analytical skills
- ✓ Time management
- ✓ Ethical Conduct
- ✓ Project management
- ✓ Communication Skills

Technical Skills

- ✓ DevOps & DevSecOps- CI/CD technologies
- ✓ Security Automation- PowerShell, Python, Bash
- ✓ Container solutions (Docker, Jenkins, Kubernetes)
- ✓ Incident response and Digital forensics
- ✓ Frameworks-NIST, ISO 27001, GDPR, COBIT, MITRE ATT& CK, CIS Controls and Zero Trust
- ✓ Cloud Service- GCP, AWS, Microsoft Azure
- ✓ Dynamic and Static Application Security Testing
- ✓ Research planning.
- ✓ Software Development and source code review

Tools

Nexpose, BurpSuite, ElasticSerach, Postman, Metasploit, Scuba, Pacu, ScoutSuite, Cobalt Strike, SecurityOnion, ApacheModSec, AlientVault, AWS Lightsail, Semgrep, SonarCube

Company: Serianu Limited **Role:** Senior Risk Consultant

Period: Nov 2021 up to Dec 2024(3 yrs)

Responsibilities

- Conducting web applications, API testing, source code reviews, and threat analysis based on OWASP.
- Perform mobile (iOS/Android) application security assessments based on OWASP MSTG.
- Conducting Red teaming, external and Internal Infrastructure vulnerability and penetration tests.
- Collaborate with development teams for Serianu customers to integrate security on the software development lifecycle (SDLC) and ensure secure coding practices are adhered to in the system's lifetime.
- Prepare comprehensive and accurate information security reports as per company standards to both technical and executive audience.
- Assist the business development team efforts by supporting initial scoping conversations and performing needs analysis to help drive business development efforts.
- Collaborate with risk management team to ensure business key risks are adequately assessed, mitigated, and provide assurance based on industry standards and internal Frameworks.
- Contribute to the continuous improvement of the offensive security program, refining red team methodologies, playbooks, and tools, and mentoring others in advanced attack techniques.
- Engaged clients on other cyber security frameworks including NIST 800-53 (CSF), CIS and ISO 27001 with an aim to help clients comply and realize benefits from deployed measures or guide in the next measures in a roadmap.

Role: Independent Information Security Consultant

Period: 2018 Up to 2022 **Employment Type:** Contracts

September 2021- October 2021 –ICDC

Conducted an Information Systems Audit (IS Audit) to review and provide assurance on the effectiveness of management controls within ICT infrastructure including IT Risk, Business Application Reviews, Networks review, Databases, and Operating System.

Jan 2021-Feb 2021- Toolkit Iskills LTD

Developed ICT policy to define rules, procedures and guidelines for proper usage and maintenance of IT assets/resources to ensure acceptable usage.

June 2019-July 2019-Meru County government

Conducted ICT Audit to determine the current ICT status, evaluate the systems, processes, and procedures in place. Later prepared final audit report to show road maps for next five years in ICT operations.

Jan 2019- Feb 2019 - National Aids Control Commissions (NACC)

Undertook penetration testing and system audit to analyze potential threats that can lead to compromise of the organization and ensure that IT systems are reliable, secure, and not vulnerable to computer attacks.

Sep 2017- Dec 2017 - Britam Insurance

Undertook a successful network security assessment which has a vast network in 8 Countries. tools used Nessus, nexpose and Metasploit.

Company : Impress Creations Ltd Role: Web development and Design

Period: Jan 2018- Dec2020 Job Type: Part-time

Responsibilities

- Developing and designing appealing websites.
- Ensuring high-performance, availability, and managing all technical aspects of the CMS.
- Managing websites back-end including MYSQL database and cPanel server access.
- Adjusting zone records and installing SSL certificates on client websites
- Developing customs functions and templates with Laravel, JavaScript, HTML, CSS and Bootstrap 4 framework when needed and integrating with WordPress.

Education

2020-2026 **Ec-Council University- Ongoing-Student ID (2020000352)**

B.Sc. of Science in Cyber Security

2015-2017 **Jomo Kenyatta University of Agriculture and Technology**

Diploma in Information Technology

Professional Certification

- Certified Ethical Hacker v10(CEH) -Ec-Council
- Certified Ethical Hacker (Practical and Master)- Ec-Council
- Elearn web Application Penetration Tester Extreme- Elearn Security (eWPTXv2)
- Certified Red Team Expert (CRTE) – Altered Security
- Certified Red Team Operator (CRTO) - Zero Point Security
- Certified Threat Intelligence Analyst (CTIA)- Ec-council
- Certified Network Security Specialist- ICSI, UK
- Certified Lead Implementer (ISO 22301) – Datasec
- Certified Secure Computer UserV2 - (Ec-Council)
- Certified Ec-Council Instructor(CEI)-Ec-Council
- Cisco Certified Network Associate (CCNA) – Cisco
- Bug Bounty Offensive Hunter -Udemy
- Application Security in DevSecOps
- Malware analysis -Udemy
